

A woman with long dark hair, wearing a bright red sleeveless dress and a teal necklace, stands in profile looking out a large window. She is holding a white mug. The window shows a lush green landscape and a cityscape in the distance. A colorful cushion is on the windowsill. To the right, a dark wood desk holds three white vases of varying heights, with the tallest one containing yellow pom-poms. The background wall is dark wood.

Twice as nice

Combine an office and a bedroom in one single space with a Flip-up Desk Murphy Bed. When you're ready to sleep, just fold down the desk and pull down the cabinet to reveal a twin, full, or queen-sized bed. In the morning, you can stow the bed, lift the desk top, and lock the legs into place to create a useful work area again.

The flip-up desk completes the transition from sleeping space to working space. Add an optional filing drawer to organize current projects or important papers right next to the place you work.

All tucked in

Hidden neatly behind doors, a Bi-fold Murphy Bed transforms any space into a comfy bedroom at a moment's notice. Doors open wide and fasten into place with locking hinges, giving you easy access to a twin, full, or queen-sized bed. There's even room behind the open doors for additional storage cabinets or shelves, helping you make the most of every inch of available space.

Night and day

By day, it's an office with open bookshelves, deep cabinets, and a convenient desktop. By night, it transforms into a Side-tilt Murphy Bed with a built-in pillow box, then disappears just as easily when you need to free up floor space again. Thick Forterra panels in a contrasting finish are a fashionable and practical choice for tops, a work surface, and visual accents.

The innovative Desk Bed can turn even small rooms into multipurpose areas, offering a twin bed and office within one 82" x 44" space. Its unique balancing mechanism creates a smooth, uninterrupted transition that keeps bedding and desktop items in place while switching from one to the other.
